

Hybrid workshop on 8 May: CRIRSCO/UNFC Reporting schemes in the co-extraction of heat and CRMs from geothermal fluids

by [crm](#) | Mar 28, 2024 | [News](#) | [0 comments](#)

The International Raw Materials Observatory (INTRAW) and the University of Miskolc (UNIM) organise a workshop related to the deployment of the combined extraction of CRM and energy from geothermal fluids). The workshop will be held at the University of Miskolc, Hungary, on **8th May 2024, 14:00-18:00 CET**. Online participation is also possible.

You can find the agenda at the [following link](#) (https://crm-geothermal.eu/wp-content/uploads/2024/03/CRM_geothermal_workshop_agenda.pdf).

The workshop will be a satellite event of the Miskolc Forum Green and Smart symposium and networking event on 9th May, which will focus on the CRM aspects of the raw material arena. In the morning, two parallel workshops will be held:

- [CRM – State of Play](#)
- [Sustainable Cement and Concrete Seminar](#)

The morning sessions will be followed by a ‘Greennovation partnership and networking forum for industry and academia’.

In addition, a networking dinner is organised on 8th May. Participation in the workshop, the dinner, and the symposium on 9th May is free but registration is required.

Detailed information about the travel to Miskolc and the hotel options will be sent to the registered participants, and also the link for those who intend to join online.

Please register **by 10 April** via the following link: <https://forms.gle/3DQhWrfZJ5fartC9A>
